11-YEAR TENURE

Data Architecture & Actionable Insights

A decade of engineering clarity from chaos. Merging Classical NLP, Systems Architecture, and Digital Growth into a singular engine for business execution.

The Core Philosophy

Data is the anchor; action is the objective.

| The Multi-Disciplinary Toolkit

Classical AI & NLP

Rule-based dictionaries, semantic parsing, and structural data cleaning for predictable signal extraction.

System Building

Architecting custom crawlers, RPAs, and "Vibe Coding" rapid prototypes to connect disparate data silos.

Growth Marketing

Treating campaigns as deterministic experiments optimized by real-time sentiment and audience telemetry.

Case Study: ParkVille Egypt

Turning Cosmetics Industry Complexity into a 360° Intelligence Engine.

| The Data Asymmetry Problem

Industry Chaos

The cosmetics market offered an enormous amount of unstructured data. ParkVille struggled to track influencers, shifting groups, and aggressive competitor maneuvers.

- Unmonitored social sentiment silos
- Opaque competitor campaign ROI
- Siloed demographic & ingredient data

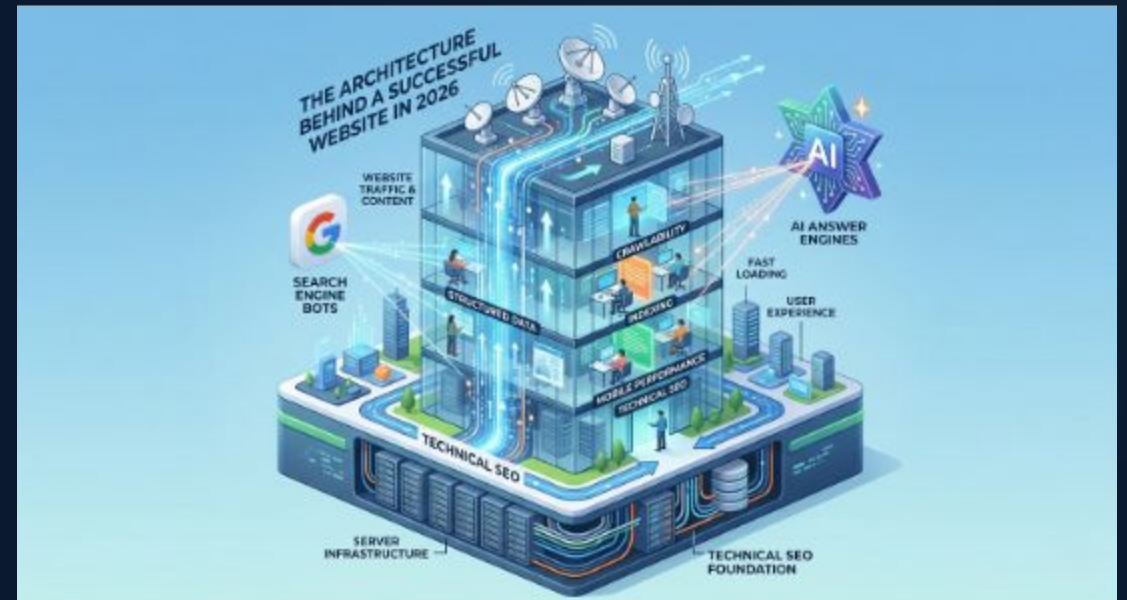

| The Intelligence Architecture

We built a proprietary **Intelligence Engine** that moved from raw crawl to executive action in four automated stages:

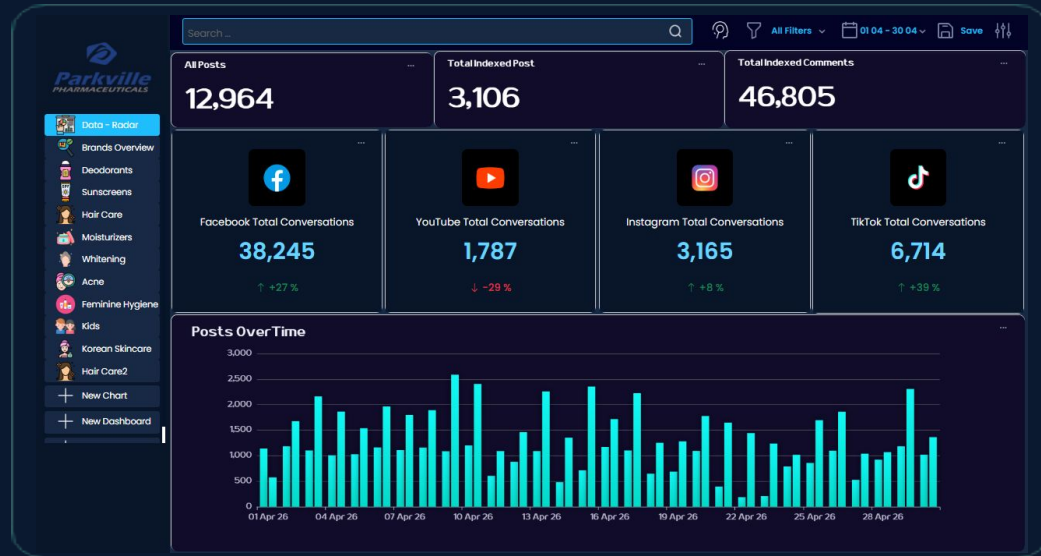

Step 1: Crawl & RPA - Automated ingestion of high-velocity industry signals.

Step 2: NLP Cleaning - Dictionary-based parsing of ingredients & mentions.

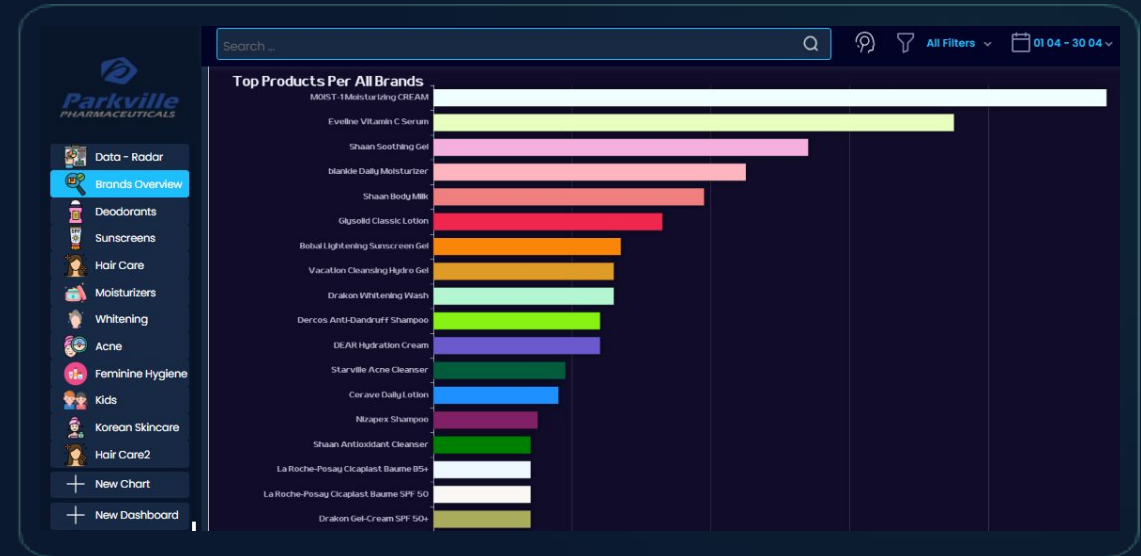

Step 3: Prompt Orchestration - LLM-driven deep insights & summarization.

| The Interface of Action

Executive KPI Dashboard
Real-time.

Functional Segmentation
Ingredient-level demand mapping.

Visualizing the 360° View: From raw crawl to high-end executive summaries (Audio & Video Reports).

| Unprecedented Commercial ROI

100%

Contract Renewal Rate

2Y

Industry Exclusivity
Clause

Strategic Outcome: Corporate Acquisition

The system's impact on sales performance led to a major success in the first year, resulting in a **successful company buyout** shortly after deployment.

CASE STUDY 2

El-Dahan Restaurants

Competitive Intelligence mapping omni-channel customer sentiment across the Egyptian Grills market to drive localized, high-yield marketing campaigns.

| The Market Positioning Challenge

Where Do We Stand?

At the beginning of 2025, legendary local brand El-Dahan returned for a critical assessment: they needed to know exactly where they stood within the hyper-competitive Egyptian grills sector following a turbulent market cycle. The market was facing aggressive pricing disruption from a new emerging trend: **Value-tier grilled sandwiches** capturing market share during economic adjustments. El-Dahan lacked data visibility to counteract this shift.

| The Omni-Channel Data Ingestion

We re-deployed our core **Crawling, RPA, and NLP stack** to aggressively scrape every single digital footprint left by consumers across the entire Egyptian culinary landscape throughout the full year of 2024.

Location Data

Scraped massive message volumes from **Google Maps reviews** across all major competitor branches to index localized complaints & praises.

Delivery Telecom

Extracted raw item-level sentiment data directly from **food delivery applications** to monitor menu conversion bottlenecks.

Social & Travel Platforms

Parsed open social channels, specialized food groups, **reviews engines, and travel platforms** to capture consumer-to-consumer dialogue.

| The Multi-Level Deep Analysis Matrix

LEVEL 01

Menu & Operational Analysis

- Granular analysis down to individual menu items and branch performance.
- Mapped explicit consumer preferences: what they loved vs. what they hated.
- Indexed the exact items driving organic conversation volume across El-Dahan and all competitors.

LEVEL 02

Influencer Attribution Mapping

- Audited influencer reviews to calculate clear head-to-head comparison winners.
- Matched specific creators to exact menu categories (e.g., specific influencers for Ready-to-Cook categories vs. new premium platter items).
- Identified rising culinary items to boost based on creator audience demographics.

| Unanticipated Strategic Insights

Our analysis purposefully covered critical blind spots that leadership had not even requested, providing them with systemic long-term defenses:

- **Macro Food Trends:** Identified which emerging culinary trends were structurally sustainable (needing adoption) vs. which were passing fads (to be avoided).
- **The "Unmasked" Competitors:** Unearthed rapidly scaling, quiet market threats that had never been flagged or mentioned by El-Dahan's executive team.

★ Capitalizing on "Mr. Emad"

Our branch-level sentiment parsing isolated an unexpected data anomaly: exceptional, highly localized community affinity centered around one branch manager, **Mr. Emad**.

We recommended elevating him to the forefront of organic campaigns. He rapidly evolved into an authentic, viral social media phenomenon, drastically driving down brand acquisition costs.

Egyptian Cuisine - World View

Summary - which website and why

- **TripAdvisor/Traveller**
Global travel and food reviews.
- **Winge/Restaurant Guru**
Local and international rankings.
- **Eater:**
Top restaurant recommendations and guides.
- **Property Finder/Aqaraman**
Location-based dining highlights.
- **Lesoll/Masr24**
Egyptian food and lifestyle guides.
- **Top10Cairo/Elmal**
Local rankings.
- **World Culinary Awards**
Global culinary recognition.
- **International Drivers Association**
Traveler restaurant recommendations.

APPETIZERS - 1.5 Top Key Opinions leaders.

Amr Sherif

Amr Sherif distinguishes himself as a standout food blogger through his creative and engaging content. His popular series, "كيفني اكيفك" empowers his followers by allowing them to choose the dishes he reviews. In another captivating series, "الور الـ16," he curates a competitive format, pitting the best versions of a specific food from top restaurants against each other. Sherif's innovative approach to food reviews consistently keeps his audience captivated.

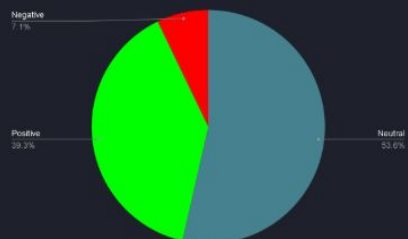

Amr El-Hady

Amr El-Hady has cultivated a significant following across Egypt and the Gulf through his captivating video content. His collaborations with prominent bloggers from both regions have significantly expanded his reach, contributing to his substantial fanbase. El-Hady's entertaining videos and unique personality have cemented his position as a prominent and influential figure in the food blogging world.

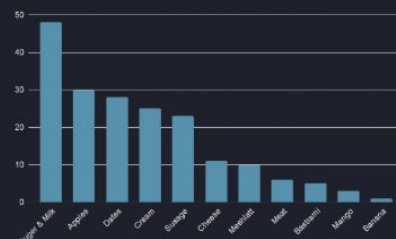

DESSERT - 3.1 Fetter

Al-Dahan

- **Unique Offering:** Fetter stands out with sweet options like Dates Fetter, highly praised.
- **Top Savory:** Sausage Fetter (classic favorite), Cheese Fetter (quality & balanced taste).
- **Top Sweet:** Sugar & Milk Fetter (traditional), Dates Fetter (remarkable & recommended).
- **Other Items:** Some less ordered, users prefer specialized fetter places.
- **Negative Feedback:** Quality issues with Mashlatt and cheese.
- **Less Ordered:** Items unavailable or not to customer taste.

Users View Towards Al-Dahan Fetter

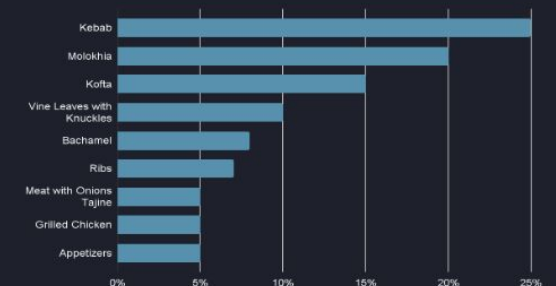

Items ordered as per users reviews

MAIN DISH - 2.1 Predefined Competitors

Top Favourable Dishes Per Item - Al-Dahan

- **Kebab:** Quality, flavorful, tender with unique marinades.
- **Molokhia:** Popular, consistent, great with grills.
- **Kofta:** Unique balanced taste, loved for spices and meat quality.
- **Vine Leaves with Knuckles:** Clear taste, high-quality ingredients.
- **Bachamel:** Good, could use more white sauce.
- **Grilled Chicken:** Juicy, tender, full of flavor.
- **Ribs:** Tender, flavorful with a charred taste.
- **Mix Grills:** High-quality meat, good presentation.
- **Meat with Onions Tajine:** Sweet onions, well-balanced meat taste.

| Execution & Measurable Success

100%

Data Validation Rate

From Predictive Report to Ground-Level Success

We didn't just deliver a static presentation; we guided the live execution. By rolling out our data-backed recommendations and selected influencers sequentially, every single target milestone hit with mathematical precision.

"With each campaign phase deployed, the real-time social hype and conversion telemetry proved our alignment was perfectly on point—validated by continuous direct gratitude from ownership for unprecedented seasonal sales growth."

Technical Synthesis

Bridging the gap between 11 years of foundations and the future of AI.

| Foundational Advantage

Classical NLP Origins

11 years of building deterministic dictionaries and regex structures. This provides the strict logic needed to keep modern LLM outputs grounded and cost-efficient.

Modern Prompt Engine

Transitioning into advanced "Vibe Coding" and RAG (Retrieval Augmented Generation). Using prompt engineering not as a "chat" but as a precise API-driven data input.
